## **Chapter 7 Lab Assignment**

- 1. Let A=[3-25], B=[-172]. Solve the following questions using MATLAB:
- a) Find  $\parallel A \parallel$
- b) Find the normalized vector of B.
- c) Find C=3A -2B.
- d) Find the dot product of A and B.
- e) Find the angle between A and B.

```
A = [3 -25]
B = [-172]
norm(A)
B / norm(B)
C = 3 * A - 2 * B
dot(A, B)
acos(dot(A,B) / (norm(A) * norm(B)))
```

```
A =

3 -2 5

B =

-1 7 2

ans = 6.1644

ans =

-0.13608  0.95258  0.27217

C =

11 -20 11

ans = -7

ans = 1.7259
```
